

Joško KNEZ, MSc

Director General of Slovenian Environment Agency, mag. Jože Knez, was born in 1973. He has a Bachelor Degree in physics and a Master Degree of Science in environmental protection.

While heading the Office of Environmental Measurements, he and his staff developed the automation of hydrological measurements and the use of analytical and predictive modelling tools to monitor and analyse the status of surface and groundwater and the sea.

Through the implementation of investment and development projects, the Environment Agency maintains a lively cycle of staff training, recruitment, modernisation of environmental monitoring equipment and the dissemination of environmental data to the public.

He was executive director general of agency between 2012 and 2018 and from 2021 onwards.
