II.1.4) Short description of the contract or purchase(s)

The framework contract aims at providing ad hoc support on statistical and probabilistic assessments related to complex statistical approaches. The development of spatial data sets and assessments requires more and more stratified approaches that often require a specialist's analysis/support to their use. This may apply to different projects (e.g. water accounts uncertainty, water quality assessment, risk/vulnerability). It is understood as an intellectual toolbox ready for land use assessments and indicators, accounting, vulnerabilities, biodiversity, water quality/resource.
