Clarification No 3

Reference: Open call for tenders No EEA/OSE/14/001

Title: Framework service contract for the provision of printing, layout and design services

Question 1

In preparation of our tender we would like to get a clarification to article 9.3.2 concerning number of pages. For print technical reasons would we like to use page numbers that are divisible by 8 and calculate our prices based on the following number of pages:

P1: 304 pages + 4 pages cover

P2: 48 pages + 4 pages cover

P3: 48 pages + 4 pages cover

P4: 16 pages + 4 pages cover

We are slightly worried about that our bid will not be regarded as admissible if we base our prices on a wrong basis so we would like to get your comments to the above.

Answer 1

The offer shall be based on that the total number of pages is divisible by four, but not necessarily eight. Therefore P1 should be based on 300 pages and P4 on 16 pages. For P2 and P3 one should add two pages, so these prices should be based on 52 pages.

Please note that Annex I - Technical Specifications related to this procedure shall be amended accordingly. A Consolidated version is enclosed to the tender documentation.
