**Clarification No 6 for open call for tenders:
Framework service contract for Geospatial data analysis consultancy services
Reference number: EEA/SES/09/001**

Question

Having regard to the draft framework contract as well as the draft specific contract which both form part of the tender documents, are tenderers supposed

- to complete these documents and submit them as separate parts of their proposal; or rather
- to submit relevant information as part of their proposal?

Answer

There is no formal requirement as to *how* the relevant information is to be provided
