

## Medical services

### *Basic program*

#### The annual visit

1. Clinical examination.
2. X-ray of the lungs, only if the medical doctor considers it necessary (included in laboratory visit). It should be done especially if the official/agent is leaving the Commission. It is obligatory in case of retirement of an official who has been exposed to ionizing radiation.
3. Electrocardiogram every two years after the age of 40.
4. Laboratory tests:
  - Urine analysis;
  - Blood test: sedimentation rate, urea, uric acid, creatinine, glucose; gamma-GT (if high, also transaminases, ASAT and ALAT); syphilis serology (every 5 years), haemoglobin, erythrocytes with specifications, leucocytes with specifications, HIV antibodies (AIDS) only after discussion with the patient and his accord and signature.
  - PSA for men from the age of 50 onwards.
  - Test for blood in stools (from the age of 45 onwards)
5. Gynaecological screening
  - Clinical examination
  - Cytology test (PAP smear test)
  - Echography of the breast and mammography from the age of 40 onwards if medically indicated
6. Special screening for men from the age of 45 onwards
  - Clinical examination
  - Rectal examination of prostate
  - Echography of prostate from the age of 50 onwards if medically indicated
7. Back of the eyes/ eye pressure
  - Every year in case of hypertension and diabetics.
  - Every two years from the age of 40 onwards.
8. Special examinations depending on the nature of work, f .ex. ophthalmologist every two years in case of extensive use of the computer.
