

The Right to Know and the Need to Act

Tim O'Riordan,
School of Environmental Sciences,
University of East Anglia

10th Anniversary Conference, European Environment
Agency, Copenhagen, 25 November 2004

Centre for Social and Economic Research on the Global Environment

Quality of Environment

Valued by:

Science

Users

Business

Regulators

Civil society

Through joint and trusting consensus

Aarhus Convention

Full Transparency

Audit trail and
supportive
justification

Social Justice

For all citizens,
especially unseen
and unborn

Appropriate Involvement

By civil/ electoral/
regulatory forums

Ecosystem Services

**Landscapes integrate
ecosystems**

**Any ecosystem change
must reconnect with
ecosystems as a whole**

**Human well-being,
health; pleasure; leisure;
connectedness; time;
family; social service**

**Connective partnerships
for scientists: users:
regulators: citizens**

Ecological Democracy

**Designing decisions
for generations ahead**

**Visualising future
states of environment
and society**

**Emphasis on the
schools and the young
via living sustainability**

**Media working to create
consistent, persistent
storylines and
interactive decisions**
