1 Overview

The 2014 Nomenclature for Reporting (NFR) used for the international reporting of emission inventory data introduced the new source category '2.C.4 Magnesium production'. Specific guidance for this sector has not yet been developed, and therefore no further information regarding emissions is provided in this chapter. In the interim, readers are advised to consult the chapter '2.C.7.c Other metal production' which provides certain default information for the non-ferrous metal sectors, including magnesium production.

2 Point of enquiry

Enquiries concerning this chapter should be directed to the relevant leader(s) of the Task Force on Emission Inventories and Projection's expert panel on combustion and industry. Please refer to the TFEIP website (www.tfeip-secretariat.org) for the contact details of the current expert panel leaders.
