

# List of tables

|           |   |
|-----------|---|
| Table 2.1 | Basic geographical and socioeconomic statistics in the Phare Countries 1994   |
| Table 2.2 | Air quality related economical statistics in the Phare countries 1990 and 1995  |
| Table 2.3 | Annual atmospheric emissions of particulate matter (1 000 t)  |
| Table 2.4 | Atmospheric emissions per capita  |
| Table 3.1 | Current SO <sub>2</sub> levels on a country by country basis and by station type  |
| Table 3.2 | Current PM levels on a country by country basis and by station type   |
| Table 3.3 | Current NO <sub>2</sub> levels on a country by country basis and by station type  |
| Table 3.4 | Current CO levels on a country by country basis and by station type   |
| Table 3.5 | Current ozone levels on a country by country basis and by station type  |
| Table 3.6 | Statistics of daily concentrations (µg.m <sup>-3</sup> ) of basic pollutants per type of station in the Phare region, 1997                        |
| Table 3.7 | Population in capitals and other large cities (> = 500 thousand)  |
| Table 3.8 | Exceedance of WHO and EU limit values   |
| Table 4.1 | Defoliation of conifers   |
| Table 4.2 | Defoliation of broadleaf trees  |
| Table A.1 | Overview of Euroairnet selected areas and stations per country  |
| Table A.2 | Compounds coverage (population exposure) level of QA/QC and data availability   |
| Table A.3 | Phare data transmission of meta-information and 1997 air quality data status (31.8.1999)  |
| Table A.4 | Available meta-information from the Phare countries before 31 July 1999   |
| Table A.5 | Number of stations and averaging time per pollutant for which the Phare countries transmitted 1997 air quality data                               |
| Table A.6 | Average percentage of valid data including range and averaging time per pollutant for which the Phare countries transmitted 1997 air quality data |

# List of figures

- Figure 2.1 Land cover in the Phare countries
- Figure 2.2 Trend of sulphur dioxide emissions in the Phare countries, 1988–97
- Figure 2.3 Trend of nitrogen oxides emissions in the Phare countries, 1988–97
- Figure 2.4 Trend of carbon monoxide emissions in the Phare countries, 1988–97 (1 000 t CO)
- Figure 2.5 Trend of non-methane VOC emissions in the Phare countries, 1988–97 (1 000 t NMVOC)
- Figure 3.1 Location of stations annual average maxima and 98th percentiles in given classes sulphur dioxide, 1997
- Figure 3.2 Location of stations annual average maxima and 98th percentiles in given classes particulate matter, 1997
- Figure 3.3 Location of stations annual average maxima and 98th percentiles in given classes nitrogen dioxide, 1997
- Figure 3.4 Location of stations annual average maxima and 98th percentiles in given classes carbon monoxide, 1997
- Figure 3.5 Location of stations data set completeness maximum 1-hourly value maximum 8-hourly moving averages in given classes ozone, 1997
- Figure 3.6 Annual concentration trends in large cities sulphur dioxide, 1988–97
- Figure 3.7 Annual concentration trends in large cities particulate matter, 1988–97
- Figure 3.8 Annual concentration trends in large cities nitrogen dioxide, 1988–97
- Figure 3.9 Maximum hourly concentration trends in large cities ozone, 1992–97
- Figure 3.10 Urban background stations the Phare countries, 1997
- Figure 3.11 Traffic stations the Phare countries, 1997
- Figure 3.12 Industrial stations the Phare countries, 1997
- Figure 3.13 Annual averages and 98th percentiles of pollutants at urban background sites, 1997
- Figure 3.14 Annual averages and 98th percentiles of pollutants at urban traffic and industrial sites, 1997
- Figure 3.15 Exceedances of limit values
- Figure 3.16 Rural stations the Phare countries, 1997
- Figure 3.17 Annual averages and 98th percentiles of pollutants at rural sites, 1997
- Figure 3.18 Monthly average lead concentrations ( $\text{ng}\cdot\text{m}^{-3}$ ) with second order polynomial trendline at K-pusztá rural background station in central Hungary
- Figure 3.19 Relationship between annual average nitrogen dioxide concentrations at urban background locations and urban/suburban land cover in the Phare countries, 1997
- Figure 3.20 Relationship between annual nitrogen dioxide concentrations at rural background locations and urban/suburban land cover in the Phare countries, 1997
- Figure 3.21 Relationship between annual average nitrogen oxide concentrations at urban background and rural locations and urban/suburban land cover in the Phare countries, 1997
- Figure 3.22 Estimated annual average nitrogen oxide concentrations at background locations in the Phare countries, 1997

Figure 3.23 Comparison of measured and estimated annual average nitrogen dioxide concentrations in the Phare countries, 1997
