

SWITZERLAND

STATE OF THE ENVIRONMENT REPORTING

State of the environment tools and building blocks

TOPICS COVERED

Themes

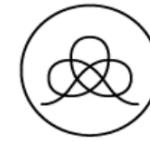

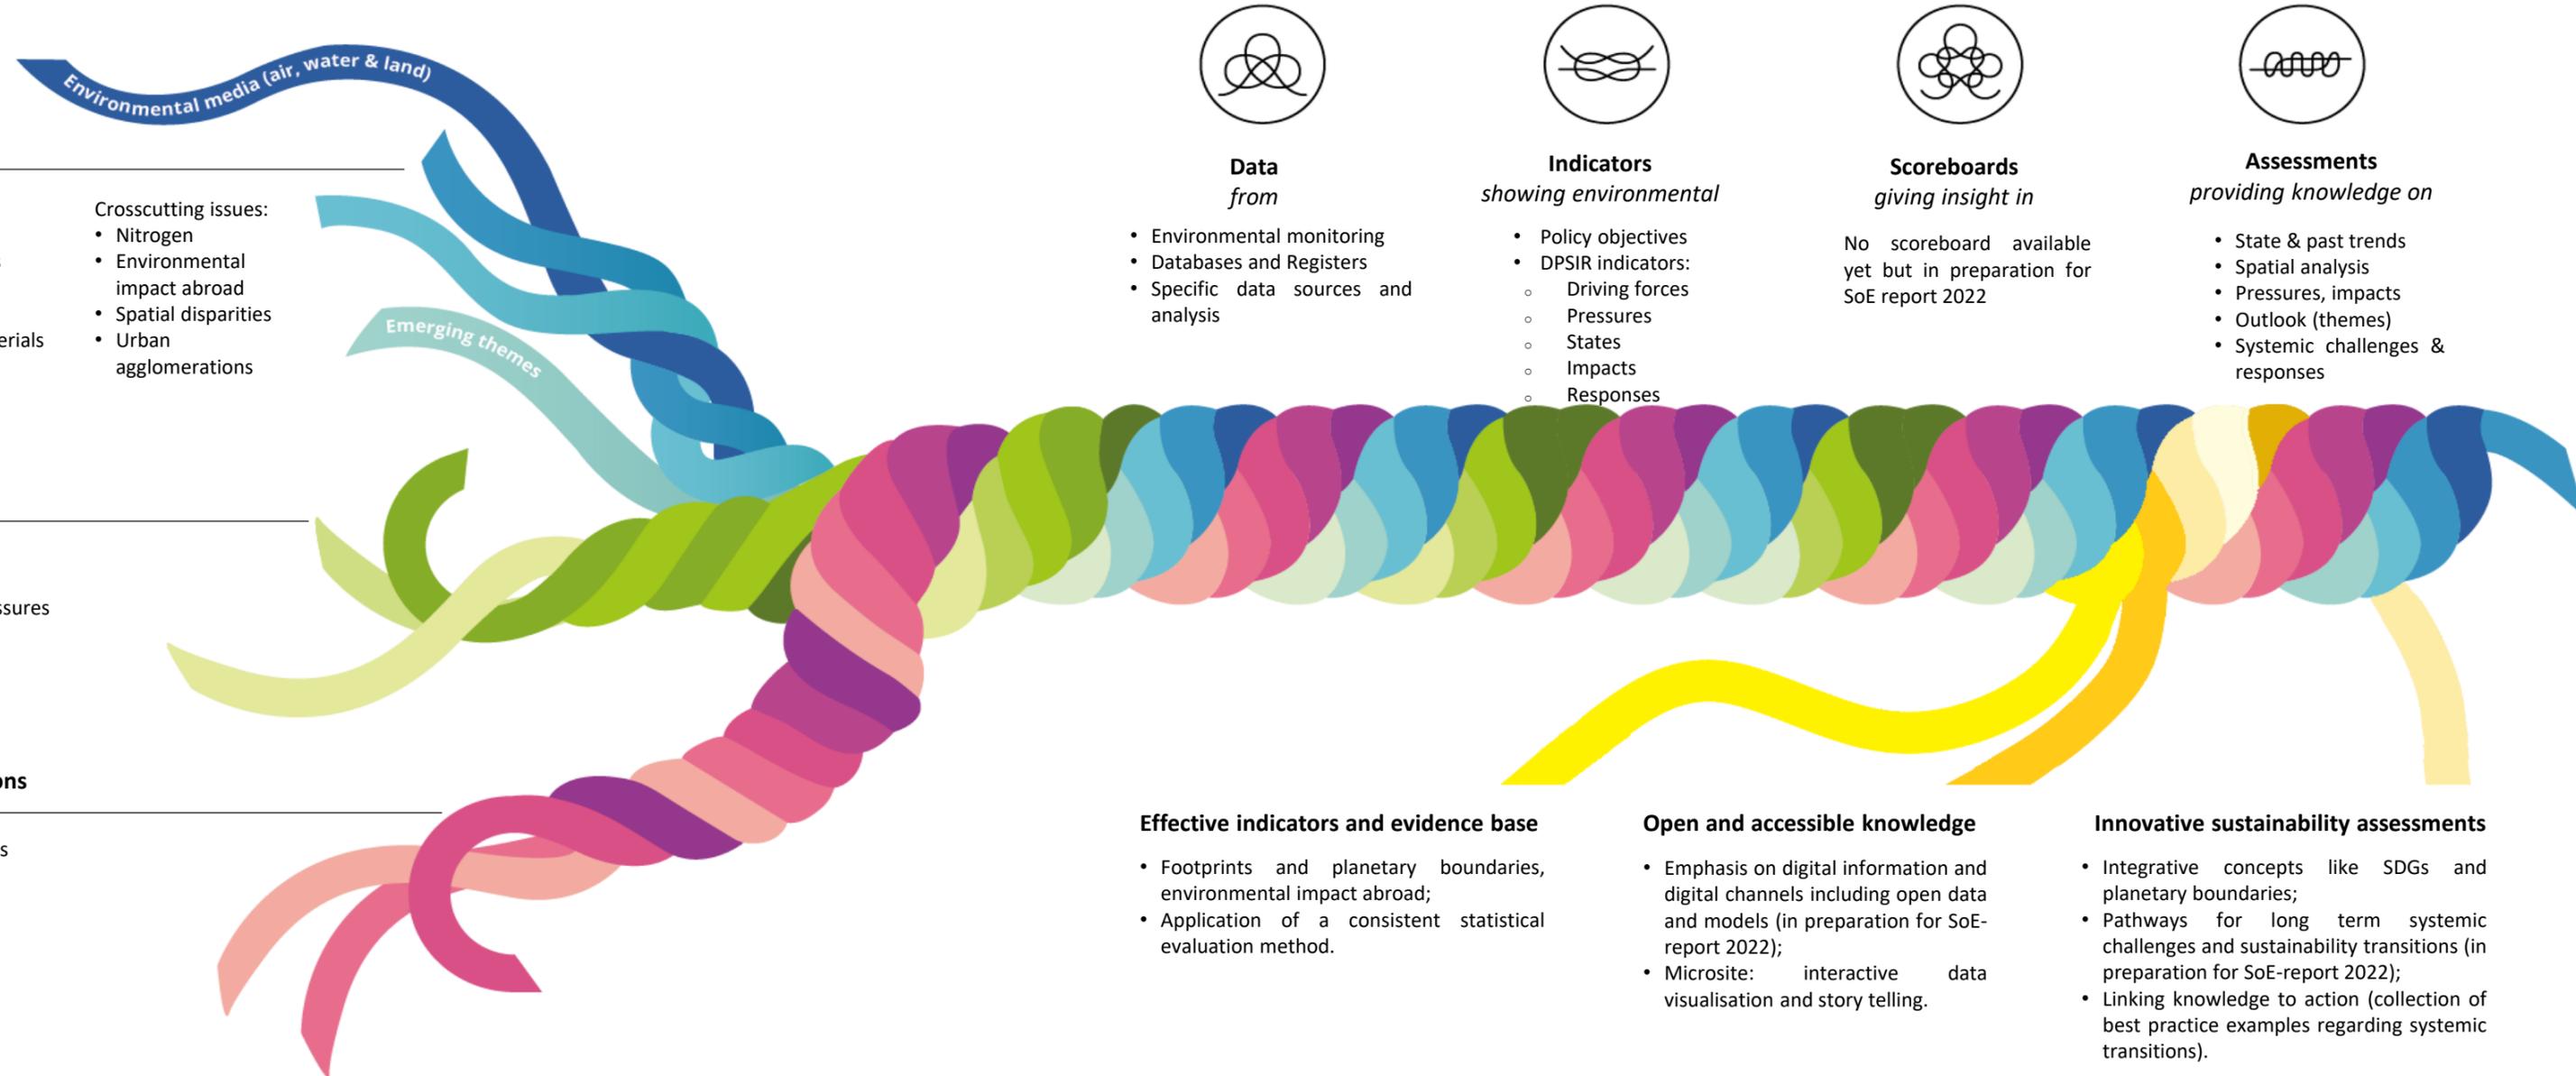

- Climate
 - Air
 - Biodiversity
 - Water
 - Forest
 - Soil
 - Landscape
 - Tranquility
 - Natural hazards
 - Major accident risks
 - Biosafety
 - Chemicals
 - Waste and raw materials
 - Contaminated sites
 - Electrosmog
- Crosscutting issues:
- Nitrogen
 - Environmental impact abroad
 - Spatial disparities
 - Urban agglomerations

Sectors

- Resource consumption
- Production & Consumption
- Interlinkages between sectors and pressures

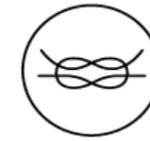

Systems and Sustainability transitions

- Introduction of socio-economic systems
- Nutrition, Housing, Mobility
- Living space

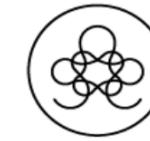

Data from

- Environmental monitoring
- Databases and Registers
- Specific data sources and analysis

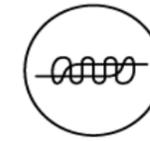

Indicators showing environmental

- Policy objectives
- DPSIR indicators:
 - Driving forces
 - Pressures
 - States
 - Impacts
 - Responses

Scoreboards giving insight in

No scoreboard available yet but in preparation for SoE report 2022

Assessments providing knowledge on

- State & past trends
- Spatial analysis
- Pressures, impacts
- Outlook (themes)
- Systemic challenges & responses

Effective indicators and evidence base

- Footprints and planetary boundaries, environmental impact abroad;
- Application of a consistent statistical evaluation method.

Open and accessible knowledge

- Emphasis on digital information and digital channels including open data and models (in preparation for SoE-report 2022);
- Microsite: interactive data visualisation and story telling.

Innovative sustainability assessments

- Integrative concepts like SDGs and planetary boundaries;
- Pathways for long term systemic challenges and sustainability transitions (in preparation for SoE-report 2022);
- Linking knowledge to action (collection of best practice examples regarding systemic transitions).

Advances in national state of the environment reporting
